

## Environmental Policy

Reynaers Aluminium Limited are the UK division of the architectural aluminium systems company, Reynaers Aluminium in Duffel, Belgium.

We recognise together with Group that our business activities impact upon the environment in a number of ways and we are committed to reducing the effect of these where possible.

Our core target is to be market leader with a strong customer orientation and environmental responsibility, providing innovation and technical leadership for commercial and domestic building.

We are committed to:

- Regularly reviewing all stages of our operations to minimise our impact on the environment.
- Prevention of pollution through management of our environment risks.
- Seeking opportunities for continual improvement
- Complying with relevant legislation, compliance obligations and the environmental requirements of our customers.
- Continually improving our resource efficiency by using less energy and producing less waste. We will dispose of such waste in a safe and responsible way, re-using or recycling wherever applicable.
- Regularly setting and reviewing environmental objectives and targets to reduce the impact of our significant environmental aspects.
- Where possible develop products that have a reduced environmental impact during their life cycle.

To achieve our commitment, we have developed and implemented an environmental management system that meets the requirements of ISO 14001. This will be subject to regular review and audit to ensure continual effectiveness of environmental management at our organisation.

The policy is communicated to all employees, customers and suppliers and is freely available to interested parties.
